Lafayette, CA 94549

Dear Members of the Lafayette Circulation Commission:

My name is Jane Doe and I live at 1000 Via Roble. I have reviewed the Lennar Homes proposed 70 home development and am extremely concerned that this will cause a traffic nightmare and safety hazard for pedestrians, drivers, and residents.

The complex features a 165 car underground garage that will have a single entry and exit on Dolores within 100 feet of Mt Diablo Blvd.

- This intersection is already extremely congested for the near 200 households that travel it daily.
- Entry into and out of a single driveway will cause gridlock.
- Parking is nonexistent as BART commuters take all the street parking spaces on Dolores lower Via Roble M-F and there is inconsistent enforcement by the Police.

An additional **primary**, dedicated entrance on the west side of the complex is required where complex residents can turn both left and right onto Mt Diablo.

Regards,

Jane Doe
